SATURDAY, March 24, 1906.

Entered at the Postoffice at Accomac C. H. a., as second-class matter.

From many sections of the county the news is received of a demand for better school buildings, due to recent acts of the Legislature permitting the trustees to borrow money for that purpose, and the citizens of every lo cality naturally see no reason why their claims should not be first con sidered by the trustees of the school districts. The trustees being the sole arbiters of these claims have obligations, necessarily to meet of great of responsibility, and the more so because they cannot borrow enough money to meet the demands upon trested to them and until they have enough money to go round it must occur to them that they should use the limited amount at their command so that it will be the greatest good to the greatest number. This being true and it is too self-evident a proposition to be disputed, the locality having the largest school population seems them from every section. Wise disthe largest school population seems to be entitled to the first favors of the trustees. Our premises being correct and we think they are, then so far as Lee district is concerned the trustees could not go far wrong in considering the claims of the county town among the first for an up-to-date school building. And in proof thereof we sabmit, it could not be more centrally located anywhere in the district or with a better prospect of being filled with pupils. Such a building, in fact, would be in easy reach of a greater number of easy reach of a greater number of pupils than in any other two sections of the district. The facts in connection with the school, indeed, speak for themselves in a way too conclusively to be mistaken. It has four teachers and more than a lawful average has been made in every department during the present session and, it is believed, that another teacher will be needed during the next session. With such a school in successful operation with such a school pop-

almost entirely unrepresented in that branch of the service; that the great States of Georgia and Alabama had not a single representative and that the consul credited to Virginia was a man of whom he had never heard and did not believe he was in reality a Virginian. This being true, the impression generally prevailing in the South, that the president is more favorably disposed to the South than any occupant of the White House since the close of war, is incorrect and it is up to Teddy to revise his list of consular appointments, if as he proclaimed when he was installed into office he was going to be the president of the whole country -- and if as Mr. Flood says, he connot find among members of the Republican party in the South men whom he can trust to represent the commercial interests of the country abroad, then he should appoint men of some party than his own.

Governor Swanson Thursday directed the Secretary of the Commonwealth to issue commissions to the following gentlemen as members of the State Board of Fisheries. W.McDonald Lee, of Lancaster, chairman; S. Wilkins Matthews, of Accomac, secretary; George B. Keezell, of Rockingham: Rorer A. James, of Danville and Bland Massie of Nelson. The appointments are for four years and all are new members except George B. Keezell, who has been on the Board since its creation.

The majority of the members of the Board, it will be noticed, are not Tidewater men and cannot, therefore, be altogether approved by us, but the chairman and secretary, it is to be for your inspection on Saturday, March hoped, may be able to correct any vagaries which they may have as to 24th. You are especially invited.

Ames, Mills & Co. the oyster industry and prevent them from imposing burdens upon those A Safe Cough Medicine for Children engaged in the oyster business which they are unable to bear.

A bulletin issued by the censu A bulletin issued by the census bureau, giving the preliminary statistics for the manufacturing industries of Virginia for the calendar year 1904, reports a material increase. The number of establishments, with a product of \$500 or over, is 3187, with a total capital of \$147,989,182, an increase of the reaction of the product of \$500 or over, is an increase of the product of \$100 or over, is also stated to the capital of \$147,989,182, an increase of the product of \$100 or over, is an increase of the product of \$100 or over, is also stated to the product of \$100 or over, is also stat 60 per cent. in capital. Salaries to officials, clerks, etc., aggregated \$4,-874, 806, and to wage earners \$27,943,-058, an increase respectively of 21 and 38 per cent over 1900.

Governor Swanson has received from the United States Treasury three from the United States Treasury three warrants, aggregating \$61,367.48, to be distributed among the 3,000 white and colored Spanish-American War veterans in Virginia, each of whom will get something like \$20. The work of disbursing will be done by Major "Sol" Cutchins. The checks represent compensation from the period just after the volunteers were organized to the time they were formally mustered into the United States Army.

A hotel to contain nearly 1,000 rooms is to be erected inside the grounds of the firm.

Cape C

Virginia Items.

The recent session of the Legislature passed three hundred and two bills, and sent them to the Governor. There were four hundred and seventy-three introduced in the Senate, and about three times as many in the House. The body proved a great bill-killer and many of the most interesting measures offered never saw outside the pigeon-holes of committee rooms.

The police have begun to wage war against all the clubs in Richmond. Conrad Dolau, manager of the Richmond Club, which is composed of three hundred of the leading men in the city, has been arraigned in court and adjudged guilty of selling liquor to others than members and was fined two hundred dollars and given two months in jail. Other cases against other clubs are pending.

ther clubs are pending. Three hundred and sixty-eight mill-on, two hundred and eighty-one housand, three hundred and sixty-ine dollars is the total assessed value f all lands, lots and buildings in the laste of Visconia as returned to Andiof all lands, lots and buildings in the State of Virginia as returned to Audi-tor Marye for the fiscal year ended June 30, 1905. Norfolk county is the wealthiest county in the State exceed-ing the "great county of Rockingham" by some two and a half millions. The whites own about 50 per cent, of all

Varieties of Corn.

ginia and western grown seed indicates that the climate has a determin cates that the climate has a determining influence on the shape and character of the grain. Our climate does not favor the development of a long deep grain with a rough top so characteristic of the western corn. This indicates very clearly that Virginia farmers must undertake the selection and improvement of strains of western corn for themselves and that they cannot use the western grown product, except possibly for foundation stock. except possibly for foundation stock These varieties of corn were plante checks 39.6 inches apart in each di ection which gave 4000 hills per acr

ulation, can anyone question the fact. that it is entitled to consideration not to the detriment of school interests in other localities, but in receiving a fair proportion according to school population, of the money to be disbursed by the trustees of Lee School district?

President Roosevelt is not the friend to the South which he claims to be, according to facts presented by Representative Flood in a speech made in Congress on Tuesday, in advocacy of the non-partison bill for the reform of the consular service. In making the charge, he stated, that the South is almost outled by more according to making the charge, he stated, that the South is almost outled by more according to the stated of the south with the state of the stated of

parge, he stated, that the South is Learning seventh with 37.31 bushels. These are some of the best varieties as revealed by one year's investigations, and it is a question of such importance to the majority of our farmers that the work will be pushed vigorously this year. When it is remembered that the yields of these 26 varieties grown side by side varied from 25 to 50 bushels, the importance of selecting and importance of selecting and importance of selecting and importance of selecting and importance. lecting and improving strains of corn adapted to a given locality becomes apparent, and it is with the idea of emphasizing this point that the above suggestions have been made.
